Philips DVP5990K_55(75)

- New skins
- new filebrowser with scrollbars, outline font (48 char from USB, and from CD/DVD limit to "yellow band" - intelligent file cutter, max. 64 char.)
- 8 lines in filebrowser
- New icons for files.
- 4 fonts for subtitles. (small, standard, medium and large)
- Option to change colors for subtitles (text, outline or background).
- Menu for "Load Original Subtitles, if not find load all" with 3 option "Load Original then all", "Load All" and "Load match name".
- Menu for set vertical position for subtitles.16 level for vertical position of subtitles.
- All menu for avi subtitles are in "General Page". You can change fonts, color and position (vertical) when movie play
- Autoload subtitles
- For avi files "GoTo: h:mm:ss". When play avi files press "Title" 2 times and enter H:MM:SS to jump to moment you want.
- WordWrap and Reformat (if subtitles line is long, automatic make wrap).
- Selectionbar follows playing file (mp3). The blue bar sets the current playing file, and yellow bar shows the selectable files. When a current playing file is on the next page of filebrowser, the user can't see it because the yellow bar still remains on the previous page. Now with this patch, blue bar "move" yellow bar.
- OSD font with outline, better contrast for all OSD message.
- DVD Quick Play. Menu is DVD-Video, with option "With menu" and "Without Menu". When second is selected, skip DVD menu and play main movie.
- Slideshow transition is set to fasted possible.
- Full support for unicod (ISO+ Joliet and USB) for all CP. (Thanks to **shoora**)

- Partial fix volume level. Volume is not changed when switch disk, etc. Not stored on power on/off.
- Partial remove UOP (User operation prohibition)
